This study aid features an innovative method of content organization. It uses outline-like checklists that are designed to lead students through the analytical steps necessary to evaluate and resolve property issues. Each chapter begins with a review and explanation of the important rules, concepts and principles that govern a particular area of property law. The review material is then synthesized into a checklist. Each chapter concludes with practice problems and solutions that illustrate how students can use the checklist to analyze property issues when writing their exams. Although other study aids may offer summaries of the law and practice questions, none offer the systematic analytical approach represented by the checklists in this book.
