Barron's SAT Strategies for Students with Learning Disabilities

Dr. Toni Welkes

Barron's SAT Strategies for Students with Learning Disabilities Dr. Toni Welkes

This book was written primarily for parents and teachers of high school students who have normal to above-average intelligence, but who also suffer from learning difficulties that stem from a variety of different causes. Just a few among those possible difficulties are attention-deficit disorder, difficulties in perception, motor control problems, and even severe anxiety attacks related to test-taking situations. The author presents a strategic study program and test-taking plan specifically designed to help such students prepare for the SAT college entrance test. Separate chapters outline test-taking strategies for the SAT's Critical Reading, Writing, and Math sections, and include advice on how to apply each strategy. Appendices cover lists of prefixes, suffixes, and roots for students to master as they bring their vocabulary up to SAT levels; plus a list of math terms and definitions to help them understand the SAT Math section's questions and answer them correctly. About The Author: Dr. Toni Welkes is an experienced learning clinician in special education and reading.
