Digital Color: Acquisition, Perception, Coding and Rendering

Digital Color: Acquisition, Perception, Coding and Rendering

In this book the authors identify the basic concepts and recent advances in the acquisition, perception, coding and rendering of color. The fundamental aspects related to the science of colorimetry in relation to physiology (the human visual system) are addressed, as are constancy and color appearance. It also addresses the more technical aspects related to sensors and the color management screen. Particular attention is paid to the notion of color rendering in computer graphics. Beyond color, the authors also look at coding, compression, protection and quality of color images and videos.

Individual chapters focus on the LMS specification, color constancy, color appearance models, rendering in synthetic image generation, image sensor technologies, image compression, and quality and secure color imaging. Ideal for researchers, engineers, Master's and PhD students, Digital Color: Acquisition, Perception, Encoding and Rendering offers a state of the art on all the scientific and technical issues raised by the different stages of the digital color process – acquisition, analysis and processing.

Contents

1. Colorimetry and Physiology – The LMS Specification, Françoise Viénot and Jean Le Rohellec.
2. Color Constancy, Jean-Christophe Burie, Majed Chambah and Sylvie Treuillet.
3. Color Appearance Models, Christine Fernandez-Maloigne and Alain Trémeau.
4. Rendering and Computer Graphics, Bernard Péroche, Samuel Delepouille and Christophe Renaud.
5. Image Sensor Technology, François Berry and Omar Ait Aider.
6. From the Sensor to Color Images, Olivier Losson and Eric Dinet.
7. Color and Image Compression, Abdelhakim Saadane, Mohamed-Chaker Larabi and Christophe Charrier.
8. Protection of Color Images, William Puech, Alain Trémeau and Philippe Carré.
9. Quality Assessment Approaches, Mohamed-Chaker Larabi, Abdelhakim Saadane and Christophe Charrier.

From reader reviews:

Robert Tyson:

Book is actually written, printed, or descriptive for everything. You can learn everything you want by a publication. Book has a different type. As it is known to us that book is important issue to bring us around the world. Close to that you can your reading ability was fluently. A book Digital Color: Acquisition, Perception, Coding and Rendering will make you to always be smarter. You can feel more confidence if you can know about almost everything. But some of you think in which open or reading some sort of book make you bored. It is not make you fun. Why they might be thought like that? Have you in search of best book or suitable book with you?

Earl Hess:

Nowadays reading books become more than want or need but also work as a life style. This reading behavior give you lot of advantages. The advantages you got of course the knowledge the rest of the information inside the book that will improve your knowledge and information. The data you get based on what kind of publication you read, if you want get more knowledge just go with schooling books but if you want truly feel happy read one together with theme for entertaining such as comic or novel. Typically the Digital Color: Acquisition, Perception, Coding and Rendering is kind of guide which is giving the reader erratic experience.

Gregory Sims:

In this period of time globalization it is important to someone to obtain information. The information will make someone to understand the condition of the world. The health of the world makes the information much easier to share. You can find a lot of references to get information example: internet, paper, book, and soon. You can view that now, a lot of publisher in which print many kinds of book. The particular book that recommended for your requirements is Digital Color: Acquisition, Perception, Coding and Rendering this book consist a lot of the information on the condition of this world now. This book was represented how can the world has grown up. The vocabulary styles that writer require to explain it is easy to understand. The actual writer made some investigation when he makes this book. That is why this book appropriate all of you.

Enrique Boggs:

Reading a book make you to get more knowledge from the jawhorse. You can take knowledge and information from the book. Book is published or printed or descriptive from each source that filled update of news. With this modern era like at this point, many ways to get information are available for you. From media social such as newspaper, magazines, science guide, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Are you ready to spend your spare time to spread out your book? Or just searching for the Digital Color: Acquisition, Perception, Coding and Rendering when you necessary it?
