Biological and Biotechnological Control of Insect Pests (Agriculture and Environment Series)

Biological and Biotechnological Control of Insect Pests (Agriculture and Environment Series)

Pest and disease management continues to challenge the agricultural community. The rise in new pest and crop problems juxtaposed with public concern over pesticide use and more stringent environmental regulations creates the need for today's agricultural producers to stay current with new technologies for producing quality crops profitably. Biological and Biotechnological Control of Insect Pests presents an overview of alternative measures to traditional pest management practices, utilizing biological control and biotechnology.

The removal of some highly effective broad-spectrum chemicals, caused by concerns over environmental health and public safety, has resulted in the development of alternative, reduced risk crop protection products. These products, less toxic to the environment and easily integrated into biological control systems, target specific life stages or pest species. Predation - recognized as a suitable, long term strategy - effectively suppresses pests in biotechnological control systems.

Biological and Biotechnological Control of Insect Pests covers these topics and more. It explores the current approaches in alternative solutions such as: biological control agents, parasites and predators, pathogenic microorganisms, pheromones, botanical insecticides, genetic control, genetic engineering of plants and biocontrol agents, and government regulations for biocontrol agents and recombinant DNA technology. This book will be a useful resource to entomologists, agronomists, horticulturists, and environmental scientists.

From reader reviews:

Ryan Daggett:

As people who live in often the modest era should be up-date about what going on or information even knowledge to make these keep up with the era that is always change and move forward. Some of you maybe may update themselves by examining books. It is a good choice for you but the problems coming to you actually is you don't know what kind you should start with. This Biological and Biotechnological Control of Insect Pests (Agriculture and Environment Series) is our recommendation to help you keep up with the world. Why, because this book serves what you want and need in this era.

Olga Harrington:

The e-book with title Biological and Biotechnological Control of Insect Pests (Agriculture and Environment Series) posesses a lot of information that you can study it. You can get a lot of help after read this book. This book exist new information the information that exist in this e-book represented the condition of the world currently. That is important to yo7u to learn how the improvement of the world. That book will bring you throughout new era of the internationalization. You can read the e-book on your own smart phone, so you can read this anywhere you want.

Kara Hogan:

In this period globalization it is important to someone to get information. The information will make a professional understand the condition of the world. The fitness of the world makes the information much easier to share. You can find a lot of recommendations to get information example: internet, magazine, book, and soon. You will observe that now, a lot of publisher that will print many kinds of book. The particular book that recommended to you personally is Biological and Biotechnological Control of Insect Pests (Agriculture and Environment Series) this publication consist a lot of the information of the condition of this world now. This kind of book was represented how can the world has grown up. The language styles that writer require to explain it is easy to understand. The writer made some exploration when he makes this book. Honestly, that is why this book appropriate all of you.

Thomas Busch:

Do you like reading a e-book? Confuse to looking for your best book? Or your book had been rare? Why so many problem for the book? But any people feel that they enjoy for reading. Some people likes reading, not only science book but novel and Biological and Biotechnological Control of Insect Pests (Agriculture and Environment Series) as well as others sources were given information for you. After you know how the truly great a book, you feel need to read more and more. Science publication was created for teacher or perhaps students especially. Those ebooks are helping them to put their knowledge. In some other case, beside science book, any other book likes Biological and Biotechnological Control of Insect Pests (Agriculture and Environment Series) to make your spare time far more colorful. Many types of book like this one.
