**Coevolution of Life on Hosts: Integrating Ecology and History (Interspecific Interactions)** Dale H. Clayton, Sarah E. Bush, Kevin P. Johnson

For most, the mere mention of lice forces an immediate hand to the head and recollection of childhood experiences with nits, medicated shampoos, and traumatic haircuts. But for a certain breed of biologist, lice make for fascinating scientific fodder, especially enlightening in the study of coevolution. In this book, three leading experts on host-parasite relationships demonstrate how the stunning coevolution that occurs between such species in microevolutionary, or ecological, time generates clear footprints in macroevolutionary, or historical, time. By integrating these scales, *Coevolution of Life on Hosts* offers a comprehensive understanding of the influence of coevolution on the diversity of all life.

Following an introduction to coevolutionary concepts, the authors combine experimental and comparative host-parasite approaches for testing coevolutionary hypotheses to explore the influence of ecological interactions and coadaptation on patterns of diversification and codiversification among interacting species. Ectoparasites—a diverse assemblage of organisms that ranges from herbivorous insects on plants, to monogenean flatworms on fish, and feather lice on birds—are powerful models for the study of coevolution because they are easy to observe, mark, and count. As lice on birds and mammals are permanent parasites that spend their entire lifecycles on the bodies of their hosts, they are ideally suited to generating a synthetic overview of coevolution—and, thereby, offer an exciting framework for integrating the concepts of coadaptation and codiversification.

**From reader reviews:**

**Justin Fernandez:**

The book Coevolution of Life on Hosts: Integrating Ecology and History (Interspecific Interactions) can give more knowledge and information about everything you want. So why must we leave the good thing like a book Coevolution of Life on Hosts: Integrating Ecology and History (Interspecific Interactions)? Some of you have a different opinion about reserve. But one aim in which book can give many facts for us. It is absolutely proper. Right now, try to closer along with your book. Knowledge or info that you take for that, you could give for each other; you can share all of these. Book Coevolution of Life on Hosts: Integrating Ecology and History (Interspecific Interactions) has simple shape but you know: it has great and large function for you. You can appearance the enormous world by start and read a book. So it is very wonderful.

**Lori Gravitt:**

Information is provisions for people to get better life, information currently can get by anyone on everywhere. The information can be a knowledge or any news even a problem. What people must be consider while those information which is inside the former life are hard to be find than now's taking seriously which one is acceptable to believe or which one the particular resource are convinced. If you have the unstable resource then you have it as your main information you will see huge disadvantage for you. All those possibilities will not happen with you if you take Coevolution of Life on Hosts: Integrating Ecology and History (Interspecific Interactions) as your daily resource information.

**Jesus Jones:**

A lot of people always spent their particular free time to vacation as well as go to the outside with them household or their friend. Were you aware? Many a lot of people spent that they free time just watching TV, as well as playing video games all day long. If you want to try to find a new activity honestly, that is look different you can read the book. It is really fun to suit your needs. If you enjoy the book that you read you can spent 24 hours a day to reading a reserve. The book Coevolution of Life on Hosts: Integrating Ecology and History (Interspecific Interactions) it is quite good to read. There are a lot of people that recommended this book. We were holding enjoying reading this book. Should you did not have enough space to bring this book you can buy typically the e-book. You can m0ore very easily to read this book from your smart phone. The price is not very costly but this book possesses high quality.

**Jessica Hurst:**

This Coevolution of Life on Hosts: Integrating Ecology and History (Interspecific Interactions) is new way for you who has interest to look for some information given it relief your hunger of information. Getting deeper you in it getting knowledge more you know otherwise you who still having bit of digest in reading this Coevolution of Life on Hosts: Integrating Ecology and History (Interspecific Interactions) can be the light food in your case because the information inside this book is easy to get through anyone. These books

build itself in the form that is certainly reachable by anyone, sure I mean in the e-book web form. People who think that in e-book form make them feel drowsy even dizzy this book is the answer. So there is no in reading a publication especially this one. You can find actually looking for. It should be here for a person. So , don't miss the idea! Just read this e-book variety for your better life along with knowledge.
