**Geneser Histología** Finn Geneser, Annemarie Brüel, Erik Ilso Christensen, Jorgen Trandum-Jensen, Klaus Qvortrup

Todos los conceptos originales que conformaron la base de la presentación de la histología en la primera edición de Histología, en 1981 continúan en Histología de Geneser. Esto vale principalmente para la máxima correlación entre estructura y función, además de con los procesos patológicos y la clínica, pero también para la intención de explicar todos los nuevos conceptos y denominaciones en su primera aparición en el libro. A fin de mantener esta estructura básica, y a la vez lograr la máxima homogeneidad posible en el texto, los cinco coautores han hecho lecturas cruzadas de las redacciones revisadas de todos los capítulos. Además, todos han contribuido con fructíferos planteos educativos y mejoras idiomáticas de todo el contenido del texto.

La explosión de conocimientos antes mencionada hizo necesaria la revisión de todo el texto del libro, en muchos casos con nueva redacción de grandes secciones. A su vez, esto permitió la actualización de la terminología.

También las ilustraciones han sido objeto de sustanciales modificaciones. Además de numerosas ilustraciones totalmente nuevas, varias de las existentes fueron reemplazadas o sometidas a cambios consecuentes con el conocimiento más reciente.

Al igual que en Histología, sobre bases biomoleculares, se utilizaron recuadros con fondos de distintos colores, donde el alumno puede poner a prueba sus conocimientos. Después de muchas consideraciones hemos eliminado los recuadros anteriores con referencias bibliográficas de ampliación, dado que la experiencia demuestra su muy escasa utilidad para los alumnos, que en la actualidad tienen acceso rápido y simple a la bibliografía a través de Internet.
