Trade for Profits: Trade to Win (Successful Day Trading and Long Term Investing Book 1) Justin C. Goldbach

This is not a book that tells you how to get rich quick with a super secret trading system. It is a handy little manual that should be at the fingertips of anyone who expects to make money day trading, investing or speculating in the markets with any system they are using. Rather than a "how-to" guide, of which there are thousands, this is a "how-to-do-it-right" guide intended to make sure you are trading whatever system you use correctly. Whether you trade futures, forex, stocks, options or any other investment vehicle, the basic message is the same: do it right or kiss your hard-earned capital goodbye! Every trader should read this book at least once per week. Every Monday morning before the markets open would be the ideal time for a review. Happy trading!

It is appealing to think you can make a fortune by day trading futures, day trading forex, trading commodities or investing in securities of any kind for long-term wealth building. Sit at your computer for a couple of hours each day, push a button to get into the market, push a button to get out of the market, and count your profits at the end of every trading day. Unfortunately, profitable trading is NOT EASY and it is not as simple as casually clicking your mouse whenever a trading signal comes around. This little book will help you understand yourself and your personal trading style so that you can trade whatever system you use without falling into common psychological traps that make most day traders and longer term investors lose their capital.
