## **Basic Laboratory Calculations for Biotechnology** Lisa A. Seidman

To succeed in the lab, it is crucial to be comfortable with the math calculations that are part of everyday work. This accessible introduction to common laboratory techniques focuses on the basics, helping even readers with good math skills to practice the most frequently encountered types of problems.

Discusses very common laboratory problems, all applied to real situations. Explores multiple strategies for solving problems for a better understanding of the underlying math. Includes hundreds of practice problems, all with solutions and many with boxed, complete explanations; plus hundreds of “story problems” relating to real situations in the lab.

**MARKET:** A useful review for biotechnology laboratory professionals.
