## **Aircraft Systems Integration of Air-Launched Weapons** Keith A. Rigby

From the earliest days of aviation where the pilot would drop simple bombs by hand, to the highly agile, stealthy aircraft of today that can deliver smart ordnance with extreme accuracy, engineers have striven to develop the capability to deliver weapons against targets reliably, safely and with precision. Aircraft Systems Integration of Air-Launched Weapons introduces the various aspects of weapons integration, primarily from the aircraft systems integration viewpoint, but also considers key parts of the weapon and the desired interactions with the aircraft required for successful target engagement. Key features: \* Addresses the broad range of subjects that relate directly to the systems integration of air-launched weapons with aircraft, such as the integration process, system and subsystem architectures, the essential contribution that open, international standards have on improving interoperability and reducing integration costs and timescales \* Describes the recent history of how industry and bodies such as NATO have driven the need for greater interoperability between weapons and aircraft and worked to reduce the cost and timescales associated with the systems integration of complex air-launched weapons with aircraft \* Explores future initiatives and technologies relating to the reduction of systems integration costs and timescales The systems integration of air-launched weapons with aircraft requires a multi-disciplinary set of engineering capabilities. As a typical weapons integration life-cycle spans several years, new engineers have to learn the skills required by on-the-job training and working with experienced weapons integrators. Aircraft Systems Integration of Air-Launched Weapons augments hands-on experience, thereby enabling the development of subject matter expertise more quickly and in a broader context than would be achieved by working through the life-cycle on one specific project. This book also serves as a useful revision source for experienced engineers in the field.

### **From reader reviews:**

#### **Hannelore Evans:**

In this 21st one hundred year, people become competitive in each way. By being competitive at this point, people have do something to make them survives, being in the middle of the actual crowded place and notice through surrounding. One thing that oftentimes many people have underestimated the item for a while is reading. That's why, by reading a reserve your ability to survive raise then having chance to endure than other is high. For you who want to start reading some sort of book, we give you this kind of Aircraft Systems Integration of Air-Launched Weapons book as basic and daily reading e-book. Why, because this book is more than just a book.

#### **John Barstow:**

Here thing why this Aircraft Systems Integration of Air-Launched Weapons are different and reliable to be yours. First of all studying a book is good but it depends in the content than it which is the content is as yummy as food or not. Aircraft Systems Integration of Air-Launched Weapons giving you information deeper and in different ways, you can find any guide out there but there is no guide that similar with Aircraft Systems Integration of Air-Launched Weapons. It gives you thrill reading journey, its open up your own eyes about the thing that will happened in the world which is might be can be happened around you. You can bring everywhere like in playground, café, or even in your technique home by train. For anyone who is having difficulties in bringing the published book maybe the form of Aircraft Systems Integration of Air-Launched Weapons in e-book can be your substitute.

#### **Cynthia Olson:**

The book Aircraft Systems Integration of Air-Launched Weapons has a lot details on it. So when you check out this book you can get a lot of help. The book was compiled by the very famous author. This articles author makes some research previous to write this book. This book very easy to read you will get the point easily after perusing this book.

#### **Jesus Curry:**

In this period of time globalization it is important to someone to acquire information. The information will make anyone to understand the condition of the world. The condition of the world makes the information better to share. You can find a lot of sources to get information example: internet, classifieds, book, and soon. You can view that now, a lot of publisher this print many kinds of book. Typically the book that recommended to you is Aircraft Systems Integration of Air-Launched Weapons this reserve consist a lot of the information in the condition of this world now. This particular book was represented how does the world has grown up. The vocabulary styles that writer value to explain it is easy to understand. The writer made some investigation when he makes this book. That's why this book acceptable all of you.
