Las plantas medicinales constituyen una alternativa para la atención primaria de salud, especialmente en países donde el acceso a los medicamentos no es equitativo para toda la población. En este libro se hace referencia a las plantas utilizadas en las comunidades de la 4ta. Región Sanitaria de Paraguay. Se describen las plantas, la distribución, los componentes químicos, las comunidades que reportan su uso y se mencionan los posibles efectos adversos producto de la asociación con medicamentos alopáticos. Esperamos contribuir para lograr el uso seguro y eficaz de las plantas medicinales facilitando su incorporación en los Servicios Primarios de Salud.
